MAKE IT BETTER

FITMENT INSTRUCTIONS

Universal Tow Bar Step

A-TBAR-STP

Installation Instructions

Installation and fitment instructions include the tools required, fasteners and hardware included in the kit.

Please follow the instructions and check installation steps with the images in this document.

Alu-Cab recommends that all sealing work is allowed to cure for 24 hours, after which you may drive the vehicle on normal paved roads. Before driving off-road with your Alu-Cab product or operating your roof conversion, an additional cure period of 48 hours is required.

Failure to follow these instructions will void your warranty. Please ensure that you follow the sealant manufacturers curing time as per their technical data sheet.

These times may differ slightly from the times we have recommended.

290mm

Installation Instructions

Mounting Option 1

3

Assembling and Adjusting the Step Height

- I. Align the step and bracket holes at your desired height level.
- II. Three height positions are available. These are shown on the right hand side. This allows the step to adjust to various vehicle heights, bumper accessories as well as your personal preference.
- III. Fasten the four M8x12 button head bolts, M8 spring washers, M8 flat washers and integrated M8 threads.

3 Height Adjustment Levels

Tip: It is recommended to mount the step as high as your rear bumper allows. This prevents reducing your vehicle's departure angle.

Installation Instructions

Mounting Option 1

4

Fastening to Tow Bar Receiver

- I. Insert the towbar step into the vehicle's receiver.
- II. Align the hole location corresponding to your desired offset position.
- III. Four offset positions are available. These are shown on the right hand side. This allows the step to adjust to various bumper sizes and spare wheel carriers.
- IV. Fasten the M12x70 hex bolt, M12 spring washer, M12 washer and integrated M12 thread.

4 Offset Adjustment Positions

Tip: It is recommended to mount the step as close to your rear bumper as possible. This prevents reducing your vehicle's departure angle.

Installation Instructions

Mounting Option 2

5

Fastening Mounting Bracket

- I. Locate the mounting bracket on the vehicle's tow bar mount
- II. Fasten the two M16x65 hex bolts, four M16 washers, and two M16 nyloc nuts using two 24mm sockets/spanners

Review all instructions information carefully before installation.

Any damages, direct or incidental to the installer and/or property due to incorrect installation of any parts are the responsibility of the installer. Due to the various applications and fitment options available, the responsibility lies with the user to ensure all mounting points are secure and tight before every trip.

If unsure, consult with your Distributor regarding the operations of our products.

Users are advised to be mindful of the load they are carrying and drive in accordance with road conditions.

WARNING

Always wear appropriate PPE (Personal Protection Equipment) when fitting our products. Although the mounting kit is designed to be DIY, if you have any doubts or concerns, contact an accredited fitment centre to carry out the work. Alu-Cab will not be liable for any injury to persons, and/or damage to products and/or vehicles.
